SUSTAINABILITY SNAPSHOT

Tindrevik Components

A supplier of machined metal parts that publishes its figures, its targets and the records behind them.

sust.in/tindrevik-components sustin.ai/org/tindrevik-components · Short links open with the sust.in migration

Sample: a fictional organisation and its fictional records, from the worked example.

Last updated 2 September 2028 | 3 of 5 milestones reported | All 9 figures linked to records | 2 SDG targets, each with baseline and evidence route | 3 dated progress updates

At a glance

1,912 MWh

Energy used

Jan to Dec 2027 · Both sites, vehicles and forklifts

64

Employees

Headcount at 31 Dec 2027 · All employees, both sites

14 hours

Training per employee

Jan to Dec 2027 · All employees; 896 hours in total

3

Recordable work accidents

Jan to Dec 2027 · Employees at both sites; contractors not recorded

Progress by topic

Energy and climate

Energy used

1,912 MWh

Jan to Dec 2027 · Both sites, vehicles and forklifts

Electricity

1,184 MWh

Jan to Dec 2027 · Both sites

Natural gas

612 MWh

Jan to Dec 2027 · Aarhus plant

Diesel

116 MWh

Jan to Dec 2027 · Vehicles and forklifts, 11,600 litres

OUR TARGET · IN PROGRESS

Cover a quarter of the Aarhus plant's electricity with the solar roof.

PROGRESS AT 2028-09

Panels connected on 2 September 2028; monthly export-meter readings since then. The share is not yet measured over a full year.

OUR TARGET · IN PROGRESS

Recover heat from the Aarhus press line.

PROGRESS AT 2028-04

Pilot started on 22 April 2028; results are measured over the 2028 heating season.

Our workforce

Employees

64

Headcount at 31 Dec 2027 · All employees, both sites

On permanent contracts

58

Headcount at 31 Dec 2027 · All employees; 6 on temporary contracts

Training per employee

14 hours

Jan to Dec 2027 · All employees; 896 hours in total

No target recorded for this topic yet.

Health and safety

Recordable work accidents

3

Jan to Dec 2027 · Employees at both sites; contractors not recorded

Fatalities from work injuries

0

Jan to Dec 2027 · Employees at both sites

No target recorded for this topic yet.

Standards we report against

Voluntary Standard

GRI Topic Standards

Listed by the publisher. Reporting against a standard is not a statement that it is met.

Data notes

PERIOD

Financial year 2027, 1 January to 31 December 2027; headcount at 31 December 2027. Renewable share of purchased electricity for 2027: pending publication (shared with the lender, not yet approved).

BOUNDARY

Tindrevik Components: the Aarhus plant and the Gdańsk workshop, with company vehicles and forklifts. Gas is used at Aarhus only; contractors are not in the accident figures.

METHOD

Totals of our own records: electricity and gas invoices, the fuel log (diesel as energy, as recorded in the log), the HR headcount export and the accident register. Training per employee: 896 hours divided by 64 employees. Greenhouse gas emissions are not shown: the 2027 calculation is not complete. 2027 is the first year of these records, so there is no prior-year comparison.

RECORDS

Electricity and gas invoices, fuel log; Electricity invoices; Gas invoices; Fuel log; HR headcount export; Accident register

STATUS

Self-reported. The figures come from the organisation's own records; Sustin has not checked them unless marked otherwise.

Framework alignment

Frameworks likely to concern this site, from its country, size band and value-chain role, checked against Sustin release 2026.6 on 2026-10-28. This is guidance, not legal advice or a compliance assessment.

Corporate Sustainability Due Diligence Directive

EU · Applicable in release 2026.6 · checked 2026-10-28

- Draft guidance Companies in scope may ask their business partners for information for their in-depth assessment, only where it is necessary, and from partners with fewer than 5,000 employees only where it cannot reasonably be obtained otherwise. Suppliers of such companies may receive these requests wherever they are established.
  Source: Directive (EU) 2024/1760, Article 8(2a), point (a), as inserted by Directive (EU) 2026/470, Article 4, point (6)(b)

Empowering Consumers for the Green Transition Directive

EU · Applicable in release 2026.6 · checked 2026-10-28

- Draft guidance Rules on environmental claims made to consumers apply from 27 September 2026 through national law. Relevant to any trader making environmental claims to consumers in the EU, including on its living site.
  Source: Directive (EU) 2024/825, Article 4(1); definition of environmental claim in Directive 2005/29/EC, Article 2, point (o), as added by Article 1

Voluntary Standard

EFRAG VSME basis · EU · Applicable in release 2026.6 · checked 2026-10-28

- Draft guidance An undertaking with 1,000 employees or fewer in the value chain of an EU reporting undertaking is a protected undertaking: it may decline requests for information beyond the voluntary standards, and contracts may not require more. The registry records the EFRAG VSME and the Commission Recommendation of 30 July 2025 as the basis of the voluntary standard. Applies wherever the supplier is established.
  Source: Directive 2013/34/EU, Article 19a(3), as amended by Directive (EU) 2026/470, Article 2, point (4)(b); voluntary standards under Article 29ca
- Chosen by the site owner as a framework of interest.

GRI Topic Standards
