

SUSTAINABILITY · FINANCIAL YEAR 2027

Tindrevik Components

Metal parts for machine builders, made at our Aarhus plant and Gdańsk workshop.

Fictional · AI image

AT A GLANCE

Our year in figures

1,912 MWh

Energy used F1

Jan to Dec 2027 · Both sites, vehicles and forklifts

Record: Electricity and gas invoices, fuel log

64

Employees F5

Headcount at 31 Dec 2027 · All employees, both sites

Record: HR headcount export

14 hours

Training per employee F7

Jan to Dec 2027 · All employees; 896 hours in total

Record: HR headcount export

3

Recordable work accidents F8

Jan to Dec 2027 · Employees at both sites; contractors not recorded

Record: Accident register

Where our energy comes from

1,912 MWh

Energy used F1

Jan to Dec 2027 · Both sites, vehicles and forklifts

Record: Electricity and gas invoices, fuel log

1,184 MWh

Electricity F2

Jan to Dec 2027 · Both sites

Record: Electricity invoices

612 MWh

Natural gas F3

Jan to Dec 2027 · Aarhus plant

Record: Gas invoices

1,184 MWh Electricity F2 62% · 612 MWh Natural gas F3 32% · 116 MWh Diesel F4 6%

Energy used: 1,912 MWh F1 · Jan to Dec 2027

Renewable electricity, and the next step

No share recorded.

Fictional · AI image The east roof (illustration).

OUR TARGET In progress

Cover a quarter of the Aarhus plant’s electricity with the solar roof.

PROGRESS AT SEPTEMBER 2028

Panels connected on 2 September 2028; monthly export-meter readings since then. The share is not yet measured over a full year.

OUR WORKFORCE

Our people

64

Employees [F5]

Headcount at 31 Dec 2027 · All employees, both sites

Record: HR headcount export

58

On permanent contracts [F6]

Headcount at 31 Dec 2027 · All employees; 6 on temporary contracts

Record: HR headcount export

14 hours

Training per employee [F7]

Jan to Dec 2027 · All employees; 896 hours in total

Record: HR headcount export

Fictional · AI image In the workshop (illustration).

Health and safety

3

Recordable work accidents [F8]

Jan to Dec 2027 · Employees at both sites; contractors not recorded

Record: Accident register

0

Fatalities from work injuries [F9]

Jan to Dec 2027 · Employees at both sites

Record: Accident register

What we set out to do

OUR TARGET In progress

Cover a quarter of the Aarhus plant's electricity with the solar roof.

PROGRESS AT SEPTEMBER 2028

Panels connected on 2 September 2028; monthly export-meter readings since then. The share is not yet measured over a full year.

OUR TARGET In progress

Recover heat from the Aarhus press line.

PROGRESS AT APRIL 2028

Pilot started on 22 April 2028; results are measured over the 2028 heating season.

MILESTONES

The year, step by step

14 February 2028

Energy records for 2027 complete

Electricity, gas and fuel records for both sites add up to 1,912 MWh.

3 March 2028

Response sent to Brakvold Machines

Supplier response pack for FY2027, with the evidence behind each answer.

22 April 2028

Heat recovery on the Aarhus press line

Pilot started; results are measured over the 2028 heating season.

FRAMEWORK INDEX

Where each figure fits

Energy used F1

Electricity F2**, Natural gas** F3**, Diesel** F4

Voluntary Standard B3 paragraph 32, second sentence · GRI Topic Standards Disclosure 103-2 · GRI Topic Standards Disclosure 302-1

Employees F5**, On permanent contracts** F6

Voluntary Standard B8 paragraph 40, point (a) · GRI Universal Standards 2021 Disclosure 2-7

Training per employee F7

Voluntary Standard B10 paragraph 42, point (d)

Recordable work accidents F8

Voluntary Standard B9 paragraph 41, point (a) · GRI Topic Standards Disclosure 403-9

Fatalities from work injuries F9

Voluntary Standard B9 paragraph 41, point (b) · GRI Topic Standards Disclosure 403-9

From the reviewed mappings of Sustin release 2026.6; identifiers only.

ABOUT THESE FIGURES

Period, boundary and method

PERIOD

Financial year 2027, 1 January to 31 December 2027; headcount at 31 December 2027. Renewable share of purchased electricity for 2027: pending publication (shared with the lender, not yet approved).

METHOD

Totals of our own records: electricity and gas invoices, the fuel log (diesel as energy, as recorded in the log), the HR headcount export and the accident register. Training per employee: 896 hours divided by 64 employees. Greenhouse gas emissions are not shown: the 2027 calculation is not complete. 2027 is the first year of these records, so there is no prior-year comparison.

BOUNDARY

Tindrevik Components: the Aarhus plant and the Gdańsk workshop, with company vehicles and forklifts. Gas is used at Aarhus only; contractors are not in the accident figures.

STATUS

Self-reported. The figures come from Tindrevik Components's own records and have not been checked by Sustin unless marked otherwise. No figure is a score, rating or label.
